

Mitigating an impact on shipping, navigation and commercial fisheries

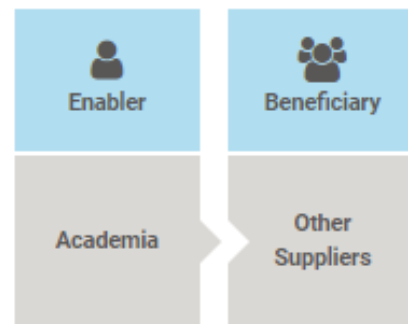

Type of Entry: Innovation Area

O&M and Windfarm Lifecycle > Project Development > Social and economic impact

<https://offshorewindinnovationhub.com/category/operations-maintenance/>

Description

Difficulties with assessing and mitigating the potential cumulative impacts on shipping and navigation due to uncertainty around risks that may arise from OSW projects. There is also a lack of standardised approach to assessing the availability of alternative fishing grounds (outside development areas) and their ability to sustain existing /displaced commercial fishing levels. It will need a cooperation of Academia and Industry.

Strategic Outcome

- Enabling disruptive innovation
- Commercialising >15MW turbine platforms**
- Maximising operational performance of existing wind farms
